Portfolio - <https://moutasimqazi.github.io/resume/>

Summary: Results-driven **AI Engineer** with industry experience delivering production-ready AI applications across **Generative AI, LLMs, RAG, Computer Vision, NLP, and AI Automation**. Developed enterprise AI platforms featuring hybrid retrieval, AI guardrails, multimodal inference, and on-premise deployments while integrating scalable backend services using REST APIs and Docker. Contributed to AI model evaluation and prompt engineering for advanced language models and built AI systems for enterprise and government use cases, including solutions supporting **22K+ civic complaints** and enterprise knowledge bases with **170K+ vector embeddings**. Strong foundation in designing scalable, privacy-first, and responsible AI systems for real-world applications.

EDUCATION

Course	University	Year	Current Semester
BTech in Artificial Intelligence & Data Science	Dr Babasaheb Ambedkar technological university (N. K. Orchid College of Engg. & Technology).	2022-2026	8 th Semester
HSC in Science	M.A.Pangal Anglo Junior College.	2020-2022	Completed

EXPERIENCES

- Movenetics Digital (AI INTERN)** (17th Feb 2026 - Present)
 - Researched, architected, and prototyped **15+ enterprise** AI solutions spanning **Large Language Models (LLMs)**, Retrieval-Augmented Generation (RAG), computer vision, workflow automation, and enterprise AI integrations.
 - Developed an enterprise-grade RAG platform indexing **5,000+** authenticated documents and generating 170,000+ vector embeddings, leveraging **FAISS**, **BM25**, metadata-aware retrieval, **AI guardrails**, and **multi-model fallback** routing for accurate domain-specific question answering.
 - Designed and deployed **12+ RESTful APIs** supporting AI chat, semantic search, prayer time calculation, Hijri date conversion, authentication, and backend AI services using Flask.
 - Built a WHOOP-like AI fitness platform integrating multiple wearable devices to collect and **synchronize health metrics** including heart rate, sleep, recovery, activity, calories, and step count through secure backend services.
 - Developed a privacy-first AI health assistant using a **self-hosted DeepSeek V4 Flash** model deployed on on-premise infrastructure, ensuring **100% on-premise** processing of sensitive health data.
 - Developed a computer vision liveness detection system using the **GoSet dataset** to classify **live versus spoofed** facial inputs for identity verification and deployed the inference service on a private server for secure processing.
 - Automated enterprise operations by deploying **self-hosted n8n** and integrating **Fireflies AI** with multiple business applications, streamlining internal workflows through intelligent automation.
 - Collaborated with engineering teams to evaluate enterprise AI platforms, prototype production-ready AI solutions, and integrate **LLM-powered** capabilities into **business workflows**.
- Solapur Municipal Corporation (AI INTERN)** (1st June 2025 - 1st Jan 2026)
 - Engineered and deployed a production AI complaint intelligence platform for the Solapur Municipal Corporation, supporting a municipal grievance system processing **22K+ citizen complaints**.
 - Built multimodal NLP and Computer Vision models to classify image- and text-based complaints across **8 municipal departments** and **42 operational sub-department** groups, automating complaint routing and department assignment.
 - Dockerized AI** inference services and deployed them on secure on-premise municipal servers, ensuring **100% local processing** of citizen complaint data and compliance with government privacy requirements.
 - Developed **RESTful backend APIs** integrating AI-powered complaint classification into the municipality's production grievance management workflow supporting **21.6K+ resolved cases**.
 - Designed automated routing logic for **50+ civic service** categories, improving operational efficiency and reducing manual complaint triage.
 - Received a **Certificate of Appreciation** from the **Municipal Commissioner** for successfully delivering a production AI solution adopted by the Solapur Municipal Corporation.
- Outlier.ai (AI Data Trainer (Contractor))** (1st June 2025 - 1st Oct 2025)
 - Contributed to **Project Andromeda**, evaluating and improving the performance of production-grade **Large Language Models (LLMs)** through systematic response assessment and prompt refinement.
 - Evaluated AI-generated responses for **factual accuracy, reasoning quality, instruction adherence, safety, and tone**, providing high-quality feedback to improve model performance.
 - Designed and optimized prompts covering diverse real-world scenarios, enhancing training datasets used for supervised fine-tuning and model evaluation.
 - Performed comparative evaluation of multiple model outputs, identifying reasoning failures, hallucinations, and response inconsistencies to improve overall model reliability.
 - Collaborated with distributed AI teams to maintain high-quality evaluation standards for enterprise-scale language model development.
 - Evaluated **LLM performance** across complex user scenarios, providing actionable feedback that improved reasoning, instruction adherence, and response safety.

PROJECTS

- ❖ **CivicChain – AI & Blockchain Powered Civic Complaint Platform**
 - **Key Skills:** Python, NLP, Blockchain, Smart Contracts, Web3
 - Initially developed at **NEXOvATE 2025** and later implemented across Solapur city in collaboration with **Solapur Municipal Corporation**, the project delivered an AI-based complaint classification system using image and text to enable automated department, prabhag, and zone allocation for faster grievance redressal. It leveraged computer vision, NLP, and blockchain-backed tracking to route civic complaints to appropriate municipal authorities, improving transparency and operational efficiency in sanitation and civic services. The initiative was **sponsored by SMC** (June 2025–January 2026) and earned a **Certificate of Appreciation** from the **Municipal Commissioner** for real-world impact.
- ❖ **AI-Powered Smart Healthcare Assistant Robot for Elderly Care**
 - **Funded by:** Dassault Systèmes ConnectNext Industry Mentorship Program | **₹1,00,000** Prototype Grant
 - **Tech Stack:** Python, LLMs, Computer Vision, NLP, IoT, Robotics
 - Advanced to **Phase 2** of the **Dassault Systèmes ConnectNext Industry Mentorship Program** after successfully completing technical review and ASL evaluation.
 - Awarded a **₹1,00,000 industry grant** for prototype development of an AI-powered robotic healthcare assistant focused on improving elderly independence.
 - Developing multimodal AI capabilities using **Large Language Models (LLMs)**, **Computer Vision**, **NLP**, and **IoT** for conversational assistance, health monitoring, and emergency response.
 - Building an integrated AI and robotics platform through hardware-software system integration with guidance from Dassault Systèmes industry mentors.
- ❖ **ImpactChain – AI Crisis Detection & Fund Distribution System**
 - **Key Skills:** Machine Learning, Blockchain, Flask
 - Designed system for detecting crisis events and enabling traceable, fair fund allocation via smart contracts.
 - Presented at **IEEE Technovation 2025 – 1st Place winner**.
- ❖ **HackathonToolkit**
 - **Key Skills:** Python, Model building, training, and evaluation, Data preprocessing and augmentation, Simplified methods for API integration, Data visualization tools, enhancing teamwork and communication, Streamlining application and model deployment.
 - Hackathon Toolkit is a Python library that simplifies hackathon projects with utilities for setup, API interaction, data handling, machine learning, and deployment, boosting productivity and innovation.
 - **Project Link:** <https://pypi.org/project/HackathonToolkit/>
- ❖ **LinkedIn Profile Optimizer Chrome Extension**
 - **Key Skills:** Chrome Extensions, Google Gemini API, Large Language Models (LLMs), JavaScript, PDF Generation, UI/UX
 - Created a Chrome extension that utilizes the **Google Gemini API** to optimize LinkedIn profiles. It fetches profile data, generates AI-powered content optimizations, and enables users to download the updated profile as a PDF for improved professional presentation.
 - **GitHub Link:** <https://github.com/MoutasimQazi/linkedin-profile-optimizer>

KEY SKILLS

- **Programming Languages:** Python, JavaScript, SQL, R
- **Generative AI & LLMs:** Retrieval-Augmented Generation (RAG), LangChain, LangGraph, LlamaIndex, Prompt Engineering, AI Guardrails, AI Model Evaluation, Agentic AI, Semantic Search, Embeddings
- **Machine Learning & AI:** Machine Learning, Deep Learning, Natural Language Processing (Hugging Face, SpaCy, NLTK), Computer Vision, YOLOv8, PyTorch, TensorFlow, Scikit-learn
- **Vector Search & Databases:** FAISS, BM25, ChromaDB
- **Backend & APIs:** Flask, FastAPI, REST APIs
- **DevOps & Automation:** Docker, Git, GitHub, n8n, Fireflies AI, Model Context Protocol (MCP)
- **Data Skills:** Data Preprocessing, Data Augmentation, Data Analysis, Data Visualization, Big Data Technologies (SQL, NoSQL)

CERTIFICATIONS

- **Artificial Intelligence Foundations: Machine Learning** (*LinkedIn Learning*)
- **Artificial Intelligence Foundations: Thinking Machines** (*LinkedIn Learning*)
- **Deep Learning: Getting Started** (*LinkedIn Learning*)
- **Deep Learning: Model Optimization and Tuning** (*LinkedIn Learning*)
- **Fundamentals to Become a Machine Learning Engineer** (*LinkedIn Learning*)
- **Machine Learning with Python: Foundations** (*LinkedIn Learning*)
- **Reinforcement Learning Foundations** (*LinkedIn Learning*)
- **Training Neural Networks in Python** (*LinkedIn Learning*)
- **Artificial Intelligence Foundations: Neural Networks** (*LinkedIn Learning*)
- **Building with Google Gemini Advanced and Ultra** (*LinkedIn Learning*)
- **Mastering Model Context Protocol (MCP)** (*LinkedIn Learning*)
- **Python (Basic) Certificate** (*HackerRank*)
- **SQL (Basic) Certificate** (*HackerRank*)
- **Prompt Engineering for ChatGPT** (*Vanderbilt University*)
- **Introduction to Cloud Computing** (*Simplilearn*)

ACHIEVEMENTS

- 1st Place – **Technovation 2025** Divisional Round (**IEEE, SVERI COE Pandharpur**). Presented **ImpactChain – AI crisis detection & blockchain-based fund distribution system**; received **₹5,000** cash prize and qualified for grand finale.
- 2nd Place – **NEXOVATE 2025** National Level 24-Hour Hackathon, **Geethanjali College of Engineering & Technology, Hyderabad**. Built CivicChain – AI-powered civic complaint tracking system on blockchain with Team Decentra 4; awarded ₹12,500 prize and internship opportunities.

EXTRA CURRICULAR ACTIVITIES

- **Co-Lead** (2025 Chapter)
 - **Google Developers Group** (GDG) On Campus NKOCET.
- **Technical Lead** (2024-25)
 - Artificial Intelligence Alliance Student Association.
- **Volunteer** (2024 Chapter)
 - **Google Developers Student Club** (GDSC) NKOCET.
- **Technical Lead** (2022-24)
 - **Genesis** – An Open-Source Community.
- **AI READS** LinkedIn Newsletter
 - <https://www.linkedin.com/newsletters/ai-reads-7044019709108760577/>
